Subject: RE: Draft City/EPA Meeting Agenda Topics, Participants, and EPA Follow-up Questions/Data Request

Alana: I forwarded this to our folks and they'll do the best they can to be responsive at the meeting.

In attendance will be Scott Plambaeck (Senior Planner with Community Development), Dennis Drennan, Mike Mulhearn, and me. I also invited Jannie Quinn (City Attorney) and Dan Rich (City Manager), though I'm not sure if they'll attend. I also invited Peter Russell of Russell Resources, who does some consulting work for the City...Mike

Subject: Draft City/EPA Meeting Agenda Topics, Participants, and EPA Follow-up Questions/Data Request

Hi Mike,

Below are draft meeting agenda topics for our meeting on Thursday, January 16th at 1 pm. Please let me know if you would like to add anything. I've also included some follow-up questions we have on previous information provided by the City and a specific data request we'd like to discuss. I've included the EPA staff who will be participating in Thursday's meeting. In addition, Alec Naugle, Elizabeth Well's supervisor will be attending. Elizabeth is unavailable to attend. It would be helpful if you could provide the City staff who plan on attending.

Thanks so much. I look forward to our meeting.

Regards,

Alana Lee

Draft Meeting Agenda Topics

Introductions

Review of / Additions to Agenda

Purpose and Objectives of This Meeting

Background/Update – EPA Potential Source Investigation of TCE Hot Spot Areas

Data Needs, Information Requests, Communication, Coordination, Points of Contact

Information Data Review and Upcoming Planned Work Activities – Questions and Discussion

Other EPA/City Updates, Community Inquiries – Upcoming Meetings

Next Steps/Action Items

EPA and Water Board Staff and Contractor Support

Alana Lee, EPA Project Manager – TCE source investigation, Vapor Intrusion, Redevelopment Activities

Penny Reddy, EPA Project Manager – Groundwater Cleanup

Keith Olinger, EPA Enforcement Officer

Bethany Dreyfus, EPA attorney

Catherine Noll, Toeroek (EPA Contractor) – Analyst

Alec Naugle, Regional Water Quality Control Board

Follow-up Questions on Previous Sewer Line Information City Provided:

- The GIS sewer line data City provided contained several features including sewer cleanouts. There is a cluster of sewer cleanouts located adjacent to the TCE hotspots. Why are there so many cleanouts in this location? Who has access to these cleanouts? Could they have any impact on the sewer flow in that area?
- Mr. Mulhearn has previously indicated that sewer lines along Evandale Ave and N. Whisman Rd do not directly intersect and that they open to the same manhole, at that intersection, at differing depths. He also stated that he is not aware of any sewer overflows in the area of the N. Whisman Rd and Evandale Ave intersection. Can this be confirmed? Does the City maintain records of sewer overflows, at manholes in particular? Would sewer flow rate data help us identify when sewer flowing along N. Whisman Rd may have overflowed either onto the Evandale Ave line or out of the manhole? If so, is this data available?
- In general, how do storm events impact sewer flow in the N. Whisman Rd, Evandale Ave and Fairchild Dr sewer lines? How does stormwater enter the sewer lines?

Specific EPA information request:

- ☐ Diagrams of sewer connections, specifically at the intersections of N. Whisman Rd and Evandale Ave, and N. Whisman Rd and Fairchild Dr.
- ☐ GIS data for stormwater and sanitary sewer lines
- ☐ Sewer and Stormwater line inspection video logs/records for Fairchild Drive between Leong Drive and Ellis St and along Tyrella Ave/Sherland Ave/Flynn Ave/Whisman Rd/Leong Drive.
- ☐ Storm and sanitary sewer as-builts, including revisions (and elevation data)
- ☐ Information/records on locations of cracks, breaks, in pipes
- ☐ Information/records of repairs
- ☐ Information/records of any sealed pipelines or manholes, and re-directed flows
- ☐ Information/records of manhole cleanouts
- ☐ Detailed information on Shallow pipe on 850 Leong Dr property
- ☐ Any sampling data of manholes, trenching, sewer lines in the N Whisman/Evandale/Leong/Fairchild Drive/Tyrella Ave/Sherland Ave area
